### No Gas? No Problem!

High-performance electric hot water cylinder

The **Electroc** Thermostore is designed to provide all the warm water underfloor heating and domestic hot water requirements for apartments and small houses. It will provide mains pressure domestic hot water and can meet the average family's hot water demands using stored, off-peak heated water. The Electric Thermostore also provides lower temperature water for up to 85m<sup>2</sup> of underfloor heating. A digital control system allows for the timed operation of off-peak heating, as well as catering for heating and hot water boost options.

## Economical & Energy Efficient!

- Self-contained unit for mains pressure hot water and underfloor heating
- Simple connections to domestic and underfloor systems
- No mains gas or Corgi installers required
- Only requires a 32A mains supply
- High flow rates

Model (Nominal Capacity)	200L	260L	320L
Immersion Heaters Fitted	4 x 3kW	4kW, 3x3kW	6kW, 3x3kW
Height	1800mm	1900mm	1900mm
Diameter	560mm	560mm	685mm
Install Footprint	800x700mm	800x700mm	950x800mm
Weight	80kg	90kg	120kg
Insulation	35mm (0% ODP)	35mm (0% ODP)	35mm (0% ODP)
Domestic Flow	15l/min	20l/min	25l/min
Underfloor Area	0-45m <sup>2</sup>	0-85m <sup>2</sup>	0-105m <sup>2</sup>
Max Electric Load	32A	32A	45A
